

The Highway 101 Improvements project is nearly complete. All roadway paving, striping, and sign placement has been completed.

Highway 101 will be open to traffic from Flying Cloud Drive to Pioneer Trail on Friday, October 15, 2021.

The following construction activities will continue to occur in the fall of 2021:

- Stormwater pond construction near Flying Cloud Drive
- Removal of the existing Highway 101 bridge over Bluff Creek
- Traffic signal improvements at the Pioneer Trail intersection
- Project clean up

All of these construction activities will occur while Highway 101 is open to traffic. Landscaping is scheduled for the spring of 2022 once grass has been established.

Thank you for your patience over the last two years during the construction of this important project.
